COURSE OBJECTIVE & EDUCATIONAL GOALS

Our philosophy for training successful practitioners in the cosmetology field is to provide students with professional teachers with imagination, creativity, and ingenuity in their application in professional training. The alert, teacher is always a "learner" as today's vocational teacher is not only a technician in the field of Cosmetology, but also a highly skilled and trained person who will continually seek to improve their methods, materials, and profession. It is with sincere intentions to train students of cosmetology to perform with competency and dedication. The academic and career standards are maintained to assure the student of superior capability in their training. The curriculum is kept flexible enough to allow for new procedures and techniques, as they are developed, yet solid enough to maintain high academic standards. The final goal is, of course, to graduate students who will secure and retain employment and advance in their profession.
